Background

I am a software engineer and web developer with expertise in a array of web technologies. While most of my professional experience is with Java and related J2EE packages, I enjoy staying up to date on emerging tools and languages. Some of favorite languages are ruby (CLI, Rails, Sinatra), JavaScript (Node.js, browser), and Objective-C (iOS, Desktop Cocoa). Most projects I create outside of work use one of those languages and I enjoy creating new projects to learn new technologies. I have made some minor open source software contributions and maintain a couple of my own small open source projects.

See my **bio** [<http://jeffremer.com/bio.html>] for more background and an explanation of specific projects.

Experience

Flite - San Francisco, CA (formerly Widgetbox)

Software Engineer - July 2009 to Present

Projects & Responsibilities

- Flexible HTML5/CSS3 single page application JavaScript MVC **ad creative runtime** [<http://www.flite.com/ad-product-lift-off>]
- **HTML5/CSS3 Mobile App builder** [<http://widgetbox.com/mobile/builder>] and runtimes using Sencha Touch and jQTouch
- **Stripes web application** [<http://widgetbox.com>] features and maintenance
- Internal build and productivity tools (CLI, TextMate bundles, gems) built in ruby and node.js

Technologies

- Cross-browser HTML creative: in-house fork of backbone.js, underscore.js, Sizzle
- Webkit mobile development: Sencha Touch, jQTouch, HTML5/CSS3/JavaScript
- Tools development: ruby, node.js
- Testing: TestNG, JUnit, Selenium/WebDriver, Jasmine, RSpec
- Java/JSP, Spring, Stripes
